PROFILE

A results-driven automation specialist with a strong track record across RPA, web development, and AI agent deployment. Proficient in UiPath, Power Automate, VB.Net, and Python, with deep expertise in process understanding, standardisation, and delivering end-to-end technical solutions. For the past year, I have completed several medium to high impact projects, driving significant cost reductions — collectively saving ~316 hours annually — while maintaining strong stakeholder relationships throughout. Adept at bridging the gap between business needs and technology, translating complex requirements into impactful, scalable solutions.

SKILLS

Robotic Process Automation (UiPath, Power Automate) • VB.Net • Python • HTML / CSS • React • VBA / Excel
• Power BI Data Analytics • GitHub

EXPERIENCE

Ngee Ann Polytechnic *Singapore*

Automation Lead, Finance Feb 2025 – Present

- **Web Development:** Implementation of HTML/CSS for Internal portal; led development of documentation hubs that improved team adoption and accelerated knowledge access across stakeholders
- **Automation & Digitalisation:** Acted as trusted technology advisor recommending fit-for-purpose solutions across a broad stack beyond RPA; collectively reduced departmental man-hours by ~316 hours (~39 working days) FY 2025.
- **AI Agents & Prompt Engineering:** Designed and deployed Microsoft Copilot Studio chatbots on the Finance portal and SharePoint Online; iteratively refined agent behaviour through prompt engineering and instruction tuning, improving response accuracy and adherence to Finance & Compliance scope boundaries
- **Project & Stakeholder Management:** Managed full project lifecycle across web and automation initiatives; served as primary point of contact for Finance stakeholders, proactively communicating timelines, risks, and progress; developed Power BI dashboards for enhanced reporting

DKSH CSSC *Kuala Lumpur, Malaysia*

Senior Executive, Finance Process Transformation Oct 2022 – Jan 2025

- Advanced UiPath (StudioPro, Orchestrator, Document Understanding), Power Automate (Desktop and Cloud), Regex, VBA, VB.Net for SAP automations, and HTML/CSS for web-based automation
- GitHub repository management for version controlling; Microsoft SQL Server for data management and archiving; Power BI for project performance reporting and tracking
- Proactively engaged with internal stakeholders as a process improvement and standardisation consultant, identifying inefficiencies, redesigning workflows, and implementing scalable solutions that reduced manual effort and improved operational consistency across the department

AGOS Asia Sdn Bhd *Kuala Lumpur, Malaysia*

RPA Developer Mar 2021 – Oct 2022

- Completed numerous automation processes in UiPath and Power Automate; integrated Excel VBA in RPA workflows; built Power BI dashboards covering P2P, I2C, R2R, and KPI tracking; handled basic to intermediate IT infrastructure (SSL setup, firewall whitelisting)
- Contributed as technical consultant on finance projects, conducting first-level feasibility assessments and project evaluations to support informed decision-making

Digital Care Systems Limited *Belfast, Northern Ireland, UK*

Data Analytics & Machine Learning Intern Jul – Oct 2020

- Image recognition on CT scans using Python ML (Keras, TensorFlow); cloud data pipeline via Microsoft Azure; data wrangling and EDA with R and Python; model evaluation, transfer learning, and hyperparameter tuning

EDUCATION

Queen's University Belfast, UK

MSc in Data Analytics 2019 - 2020

BSc in Accounting 2017 - 2019
