

Nicholas Tan

MSc Data Analytics · RPA Developer · UiPath · Power Automate · Power BI · Python

 Singapore  +65 8269-7279  nicholastkt04@outlook.com  [linkedin.com/in/nicholastan-0204](https://www.linkedin.com/in/nicholastan-0204)

SUMMARY

A results-driven automation specialist with a strong track record across RPA, web development, and AI agent deployment. Proficient in UiPath, Power Automate, VB.Net, and Python, with deep expertise in process understanding, standardisation, and delivering end-to-end technical solutions. Completed 12 medium to high complexity projects that have driven significant cost reductions — collectively saving ~316 hours annually — while maintaining strong stakeholder relationships throughout. Adept at bridging the gap between business needs and technology, translating complex requirements into impactful, scalable solutions.

SKILLS

Robotic Process Automation	UiPath	Power Automate	VB.Net	Python	HTML / CSS
VBA / Excel	Power BI	Microsoft SQL	Machine Learning	Data Analytics	GitHub

EXPERIENCE

Automation Lead, Finance

Feb 2025 – Present

Ngee Ann Polytechnic

Singapore

Web Development

- Redesigned and developed the department Intranet for improved user experience and UI using HTML/CSS
- Led end-to-end development of documentation hubs that improved team adoption and accelerated knowledge access across Finance stakeholders

Automation and Digitalisation

- Process understanding, standardisation, documentation and development
- Acted as trusted technology advisor to business users, assessing requirements and recommending fit-for-purpose solutions across a broad technology stack beyond RPA
- Collectively reduced departmental man-hours by ~316 hours (~39 working days) annually

AI Agents & Prompt Engineering

- Designed and deployed Microsoft Copilot Studio agents as intelligent chatbots embedded in the Finance portal, enabling staff and visitors to query a curated knowledge base via natural language
- Engineered prompt structures and knowledge base configurations to ensure accurate, context-aware responses aligned with Finance policies and workflows
- Deployed and integrated agents onto SharePoint Online Modern pages, providing seamless in-portal access without additional tooling
- Iteratively refined agent behaviour through prompt engineering and instruction tuning, improving response accuracy, tone consistency, and adherence to Finance & Compliance specific scope boundaries

Project Management

- Managed full project lifecycle for both web development and automation initiatives — from requirements gathering and scoping to delivery — ensuring on-time execution across multiple concurrent projects

- Partnered closely with Finance business users to define requirements, translate needs into technical deliverables, and align expectations throughout each project

Stakeholder Management

- Served as the primary point of contact for Finance stakeholders across web development projects, facilitating regular check-ins and translating business needs into actionable development plans
- Proactively communicated project timelines, progress, and risks to Finance teams, ensuring alignment and reducing back-and-forth during delivery
- Developed Power BI Dashboard for enhanced data visualisation and reporting capabilities

Senior Executive, Finance Process Transformation

Oct 2022 – Jan 2025

DKSH

Kuala Lumpur, Malaysia

- Advanced UiPath (StudioPro, Orchestrator, Document Understanding)
- Advanced Power Automate (Desktop and Cloud)
- Advanced Regex for complex string manipulation and document processing
- Advanced VBA scripting for data ETL processes within Excel
- HTML/CSS for web-based automation; VB.Net for SAP automations
- GitHub repository management for version controlling
- Microsoft SQL Server for data management and archiving
- Power BI for project performance reporting and tracking

RPA Developer

Mar 2021 – Oct 2022

AGOS Asia

Malaysia

- RPA development in UiPath and Power Automate (incl. WinAutomation)
- Completed 7 automation processes, primarily within UiPath
- Integration of Excel VBA in RPA workflows
- Power BI dashboards — 7 created including P2P, I2C, R2R, and KPI tracking
- Basic to intermediate IT infrastructure (SSL setup, firewall whitelisting)

Data Analytics & Machine Learning Intern

Jul – Oct 2020

Digital Care Systems Limited

Belfast, Northern Ireland, UK

- Image recognition on CT scans using Python ML (Keras, TensorFlow)
- Cloud data pipeline construction via Microsoft Azure
- Data wrangling and EDA with R and Python (Pandas, NumPy, Matplotlib)
- Model evaluation, transfer learning, and hyperparameter tuning

EDUCATION

Master's Degree — Data Analytics

2019 – 2020

Queen's University Belfast

LANGUAGES

Mandarin	Native
English	Native
Cantonese	Limited Working

CERTIFICATIONS

UiPath — Diploma of Completion: RPA Developer Advanced
DataCamp — Machine Learning with the Experts: School Budgets
DataCamp — Unsupervised Learning in R
DataCamp — Image Processing in Python
DataCamp — Case Study: Exploratory Data Analysis in R
